

Sweeper

Sweepers for excavators

engcon's sweepers – Make the most of what the excavator has to offer and open up previously undreamed-of possibilities in a wide range of speciality areas. Regardless of whether you'll be sweeping snow, sand, gravel or soil, this will soon become a favorite tool that you just cannot live without. In the winter, you can use it in areas such as crosswalks, pedestrian walkways, railroad points, cabin and container roofs, balcony roofs and more, where snow normally has to be cleared manually. In the summer, the brush can be used for sweeping road sand and gravel, brushing grassed areas, foundations, rocks and more.

The only limit is your imagination. A hydraulic motor provides the power, and a geared chain drive enables brush rotation speed to be adjusted. The open design allows unsurpassed service-friendly access, and the standard polypropylene sweepers can be replaced quickly and easily. Easily adaptable for the EC-Oil automatic oil connector system and can thus be connected without the operator having to leave the cab.

NEWS! The EC-Oil automatic Quick Coupler system is a free standard on all engcon's hydraulic tools with S45–S80 attachment points.

Specifications

Model	SR800	SR1300	SR1600	SR1800	SR2000
Min hydraulic flow: (gal/min)	5.3	5.3	5.3	5.3	5.3
Max hydraulic flow: (gal/min)	15.9	15.9	15.9	15.9	15.9
Weight excluding attachment point: (lbs)	463	529	573	606	639
Width A: (inch)	31.5	51.2	63	70.9	78.7
Height B: (inch)	49.5	49.5	49.5	49.5	49.5
Length C: (inch)	41.7	41.7	41.7	41.7	41.7
