

Werk-Brau manufactures a complete line of O.E.M. and replacement attachments for excavators, mini excavators, backhoes, mini and full size loaders and crawler loaders. All over the world Werk-Brau attachments can be found hard at work in the toughest of conditions.

Tilting Coupler

The D-Lock tilt has been designed with a compact narrow body for better visibility and performance, giving it serious benefits over other brands. The D-Lock Tilt allows operators to simply tilt all attachments rather than having to move the entire machine, improving the productivity and versatility of the machine resulting in increased profits. Mated with our rugged, triple-sealed power actuator, the D-Lock Tilt Coupler is built for virtually maintenance-free and trouble-free performance.

Features

Automatic front lock - Locks the front pin in the event the rear pin is not secured

Multi-pin centers, picks up all attachments in the same weight class with the same pin diameter

Highly visible front lock indicator

Triple sealed actuator

Safety system does not rely on gravity

Dual pin lock - Locks both front and rear pins in the event of loss of engagement force

Unlock process is designed to release only when the operator intends to do so, in a controlled and safe manner

Simple yet safe unlock procedure eliminates accidental releases

Compact design - Improving machine performance

No greasing or lubrication required

Only requires four hydraulic lines

Up to 180 degrees of tilt
